

## Market

Prototip DOOEL Skopje is one of the most important construction companies in the Republic of Macedonia and beyond. The main directions of this company are: continual investments in future improvements, ambitious development plans with permanent introduction of new technologies, equipment and machines, provision of highly professional personnel, all with the main goal: greater productivity, affirmation and fair competition.

The company has successfully survived the transformation from contractual to market economy and its rapid growth begins back in the early 1990s and continues even today, and shows no signs to stop. This company can fully meet the strict criteria of investors and designers in all areas of the construction technique, and involve in the construction of any type of a building structure, at any location and time.

The company Prototip DOOEL Skopje has constructed buildings of various types: administrative and business buildings, trade and service buildings, hospitality and tourist buildings, industrial and commercial buildings, residential, individual, collective, petrol stations, special purpose and public buildings. It has constructed buildings on the territory of the Republic of Macedonia, Serbia, Kosovo, Albania, Russia and other former Yugoslav republics.

## Achievements

The company Prototip DOOEL Skopje has obtained all types of licenses (A, B, C, D, E), as well as the certificates ISO 9001:2008, ISO 14001:2004 and BS OHSAS 18001:2007.

## History

Few are the cases when an assisting company, established in the past to support the larger

companies, managed to become a strong company and a real brand.

Such is the case with the company Prototip DOOEL Skopje. This company was established in the distant 1977, as a company for installation of final products.

Three decades later, the company has performed more final works in the area of steel, aluminum, glass and luminous advertisements.

In 1993, the company Prototip DOOEL Skopje opened its own representative office in Sochi – the Russian Federation, under the cover of which a number of buildings were built, such as: Sports and Recreation Complex in Astrahan (capacity of 7000 spectators), the "Vorstadt" Bank in Orenburg (6500m<sup>2</sup>), the shopping center "City Plaza" in Orenburg (10000m<sup>2</sup>), the Commercial and entertainment center "Grand river" in Astrahan (8200m<sup>2</sup>) and many other.

## Product

The company Prototip DOOEL Skopje has wide range of products which are manufactured or

obtained by processing of materials of world recognized brands.

Concerning the aluminum constructions, the company offers to its clients more types of facades (structural, half-structural, classical, ventilated, spider), automatic doors (Dorma) and aluminum fences. The company also carries out processing of the following composite panels: Alucobond, Jbond, Trespa and granite composite panel. These panels are processed on CNC machine, under particular dimension. Concerning the PVC joinery, it manufactures: windows, doors and fixed partitions.

Prototip DOOEL Skopje manufactures: double-glazing glass, argon filled glass, structural glass, glass fences and treads, glass partitions (fixed and winged), soundproof glass, decorative and sanded glass.

In addition to the abovementioned products, the company in its new building in Pintija, manufactures bearing steel structures, antenna towers, tank ends from F800mm to F3000mm and thick up to 12 mm), horizontal and vertical tanks, carriers, doors (safety, fireproof, garage), but also tinsmithing such as roofing works and manufacturing ventilations.

It is interesting that this company holds high position on the market of luminous advertisements since 2007.

The plant for luminous advertisement of Prototip DOOEL Skopje manufactures totems, pylons, spreaders, city lights and billboards, 3D plexiglass letters, composite material, inox, shop windows, advertising booths, signposts, info boards, traffic signs and other advertising and informational products.

In Macedonia, especially in Skopje, a great number of contemporary constructing facade solutions have been realized, the visual and aesthetic realization of which is the main indicator of the experience of this company.

The signature of Prototip DOOEL Skopje is put on SC Boris Trajkovski, the automobile showrooms Porsche, Citroen, Renault, PSS, Mi-Da, Peugeot-Euroimpex, Mercedes, Honda, the petrol stations of Makpetrol and Okta, the hotels Karpos, Best Western, Granit, Inex Gorica, Milenium in Ohrid, the building Lumix. 145 Sports halls throughout the Republic of Macedonia are under construction, as well as the new buildings of the Administrative Court, the Ministry of Foreign Affairs, the administrative building of Deutsche Telekom. The company is proud of all buildings, however, the latest

and the most important ones that should be pointed out are the Memorial Center of Todor Proeski in Krusevo and the Holocaust Memorial Center for the Jews where lots of new materials were applied. The company is also proud of the curved windows of the building Hulk Bank (former IK Bank) and the crushed glass of the Memorial House of Mother Teresa.

### Recent Developments

In 2007, Prototip DOOEL Skopje extended its product range with the opening of the plant for luminous advertisements.

This plant has cutting equipment for PVC foil up to 1,6m width, equipment for vacuuming plexiglass and experienced personnel for branding, application and installation of any type of promotional material.

Emphasis should be also put on our new building of Prototip DOOEL Skopje for steel constructions, located in Pintija. The construction started in October 2009 while the manufacturing in this building started on 26 January 2011.

This building extends on 31.500m<sup>2</sup> area and has equipment for manufacturing steel constructions, cutting and welding steel and inox materials in all procedures.

### Promotion

This construction company is proud of its tradition, existence, tradition and acting during a period of more than 35 years. For that time, the company has grown into one of the largest players in the business area of the Republic of Macedonia and the region.

Prototip DOOEL Skopje builds its success based on continuous proving of the quality and the modern design of its buildings as well as through the communication with the investors and architects.

The company has left behind a number of representative buildings which can be seen on the modern and redesigned web site since the end of 2011.

### Brand Values

The company Prototip DOOEL Skopje supports its clients and investors-oriented mission, as well as their wishes and ideas. With this orientation, the company supports the following values:

- high quality,
- expertise,
- complete competence,
- aesthetics and

- successful combination of the modern architecture and design.

Prototip DOOEL Skopje successfully responds to any challenge thanks to the long-time investment in quality human and material resources, therefore striving to be highly competitive on the Macedonian, as well as on the European market.

All activities carried out by the company are coordinated by highly professional personnel, thus observing the world standards, the energy efficiency and environment.
