

Market

The construction company TRANSMET with more than 20 years of experience is one of the leading construction companies in Macedonia employing more than 500 employees. The company is fully focused on its clients, with a reputation for major infrastructure projects in the past, but also for the upcoming ones in the future.

During its existence TRANSMET became one of the leading construction companies on the domestic as well as the regional markets, primarily, thanks to its capability, innovativeness and knowledge of the entire team of employees as well as its remarkable capability for adapting towards the changes in the business environment.

Achievements

The success of the company is based on the mutual efforts of the entire team of its employees, the development of new technologies and the continuous effort for coming up with creative and innovative solutions in the construction practices.

TRANSMET seeks excellence in all areas of the company's business and is committed to continuous enhancement and progress. One way the company works to achieve this goal is through the long term education and training of employees, who are the building blocks of TRANSMET's future.

To validate the quality of the services provided by the company as well as to validate its awareness in taking care of the environment, TRANSMET is certified with the international standards ISO 9001:2008, ISO 14001:2004 и OHSAS 18001:2007.

The entire effort for planning, investments and realization resulted in recognizing Transmet to be the Macedonian Superbrand for two consecutive years in 2013/2014 and 2015/2016 as well to be awarded with the International Construction Award for 2015.

History

The beginnings of the construction company TRANSMET date back in 1992 when the company was first founded. The initial phase, registration and organization of the company, is very soon followed by the investment in its very own vehicle fleet, i.e. a complete and modern machinery, plants and quarry. Dedicated to its work, the company quickly finds its place in society. Participates in the construction of several important projects by which it both contributes and imposes its own principles in the way of work in the Republic of Macedonia.

As a result of the increased demand of our services, the company's Management makes a long-term development strategy, and makes a decision for increased investments in assets, real-estate, construction machinery as well as plants for production and processing of materials in order to

increase the competitiveness in the relevant sector as well as to satisfy its client's needs.

Transmet's expansion and growth both contributed for change in the structure and size of the company, becoming a large enterprise both according to the production capacities and the achieved profits, as well as according to the number of employees, whereas today it has a staff of more than 500 employees of all profiles.

Product

TRANSMET is constantly expanding its range of services enabling its clients quality and innovation in all constructions according to international standards.

The construction company TRANSMET successfully represents in the country and in the region the following services: civil engineering, commercial buildings, hydroconstruction, transportation services, etc.

Besides the construction of big infrastructure projects the company has been also active in the mining sector by performing surface excavation of minerals with discontinued technology in which sector it is Macedonia's leading company.

Following its strategic commitment for sustainable development of the construction sector, promotion of green building and environmental protection, TRANSMET started with its activities for the energy efficiency of buildings, where in 2015 it acquired the License for performing energy audits.

Some of the more significant projects of the company are the construction of a section from the Kicevo-Ohrid Motorway, construction of the surface fountain on the "Macedonia" square in Skopje, reconstruction of the Bul. M.T.Gologanov, construction of access road for the dam "Recani", collector system on the river bank of river Kratovska, infrastructure for the industrial zones TIDZ Bunardzik and TIDZ Prilep.

Recent Developments

TRANSMET has made a significant success in the recent years and is listed among the leading construction companies in Macedonia thanks to its participation in several major infrastructure projects such as: construction of a section from the Kicevo-Ohrid Motorway Project, the boulevard M.T.Gologanov, the construction of the fountain on the "Macedonia" square in Skopje etc.

The company is constantly investing in the latest technologies and modern equipment by making some significant investments in this area with the purpose of increasing its competitiveness as well as to meet the needs of its clients.

In 2015 they make their latest investment in purchasing 3 concrete batching plants located in Kicevo and Skopje, as well as 1 asphalt production plant located in Skopje.

In the first half of 2017 the EMPORIO Business Centre shall open its doors for the visitors, a modern building built as a public-private partnership with the municipality of Gorce Petrov and it is the first project

of this kind in Macedonia. The Business Centre will be placed in an area of approximately 30 000 square meters and it will be located on the section from the municipality's regional park and will extend to the main street Gorce Petrov. Within the building, which is originally planned to have 5 floors, it will also have a two-level underground parking lot with a total of 350 parking spaces.

Promotion

During the 20 years of its existence, the construction company TRANSMET has been constantly making its contribution to building a better environment. The company's motto is: "We restore the past... We build the future...". This implies a big responsibility, TRANSMET performs all works in the best possible way, turning its conceptual designs and ideas into an action and product.

TRANSMET is part of the society where it works and performs its activities and for this purpose it gives its own contribution for the development of the society and for the improvement of the quality of life to the population by promoting positive practices and by supporting different projects for the culture, education, sports etc. for which the company has been awarded with several awards for successful cooperation and significant contributions.

Aiming to support the initiatives for personal development of the most talented students from Macedonia in 2015 they promoted the Transmet Academy where they have awarded scholarships for the top 10 students from all faculties in the country to attend the Certified Academy for development of creative, innovative and business-skills.

In 2015 the company launched a project in co-operation with the Red Cross of Macedonia- "School clubs for education and prevention" with the purpose of strengthening the capacities of the youth in 19 elementary and secondary schools on the territory of the capital city of Skopje as well as to provide first aid within the community.

Brand Values

Quality, speed of execution of works, the maximum respect for deadlines and complete offer are trumps that make the company's key competitive advantage. With the expansion and continuous improvement of their services, as well as investments in the latest construction machinery the company seeks to satisfy its constant clients and business partners, attract new clients and position itself on the new, demanding markets in which it has already shown a considerable success.

The company has been recognizable for the good image it has built in this sector, the reputation of an honest and responsible company, promptly completing its commitments to their clients and partners.

Transmet continues to work at increased pace while continuously investing within and outside of the borders of the country.
